

Project 12

Mission

Project 12 provides an inclusive, flexible Grade 12 program designed to support neurodivergent and learning-diverse students. Through small classes, individualized pathways, and experiential, nature-inspired learning, we help students complete high school with confidence and prepare for what comes next.

Vision

We believe there is more than one way to succeed in Grade 12. Project 12 reimagines secondary education as a place where students are understood, supported, and empowered to move forward into post-secondary education, training, or employment on pathways that fit who you are.

Values

- **Belonging**
Students learn best when they feel safe, respected, and valued.
- **Flexibility**
Learning adapts to the student, not the other way around.
- **Strength-Based Growth**
We build on students' abilities, interests, and potential.
- **Experiential Learning**
Hands-on, real-world, and nature-connected experiences deepen understanding and engagement.
- **Independence & Readiness**
We develop academic skills alongside executive functioning, self-advocacy, and life skills.
- **Respect for Individual Pathways**
Success looks different for every student—and every future is valid.
