

# Project 12

## *Mission*

Project 12 provides an inclusive, flexible Grade 12 program designed to support neurodivergent and learning-diverse students. Through small classes, individualized pathways, and experiential, nature-inspired learning, we help students complete high school with confidence and prepare for what comes next.

## *Vision*

We believe there is more than one way to succeed in Grade 12. Project 12 reimagines secondary education as a place where students are understood, supported, and empowered to move forward into post-secondary education, training, or employment on pathways that fit who you are.

## *Values*

### **Community**

We build a sense of belonging and togetherness.

### **Cooperation**

Students work together to achieve common goals.

### **Communication**

Clear and respectful communication is key in all we do.

### **Courage**

We encourage students to take risks and overcome challenges.

### **Critical Thinking**

Students learn to analyze, reflect, and make thoughtful decisions.

### **Consequences**

We emphasize understanding the outcomes of actions.

### **Compassion**

Kindness, empathy, and caring for one another are central to our ethos.
