

A message from James

I hope that you are enjoying a safe and adventurous summer! I look forward to working together with you next month!

The program looks exciting and I am sure that we will find a lot of joy in our journey.

Until then, **embrace the day!**

Our new campus

We have completely moved into our new location at 867 Décarie.

In fact, we ran our summer school program there. It is laid out perfectly for our project12 program.

If you have not already been for a visit, contact me and we will arrange a full tour before classes begin.

LEARNING TOGETHER

The term will begin with three courses—**English, Families in Canada, and World Issues.**

We will work through each course together, completing assignments, quizzes, and modules during the school day.

You should never feel lost or fall behind because our teachers will be working alongside you every step of the way, providing guidance, answering questions, and making sure you understand the material before moving on.

Our goal is to help you build confidence while developing the skills and habits needed for success in all of your future courses.

PREPARING FOR SEPTEMBER

If you would like to prepare for September, make it a habit to read and write something every day.

Spend about an hour doing something academically engaging, such as:

Reading an article or a book

Writing in a journal

Researching a topic that interests you

Exploring current events

The goal is not simply to complete work, but to keep your mind active, strengthen your learning habits, and arrive in September feeling confident, curious, and ready for a successful start.

Be a teenager

Summer is for adventure. Sleep in once in a while, spend time with friends and family, explore new places, and don't be afraid to try something you've never done before. Go hiking, swim in a lake, ride your bike, learn a new skill, volunteer, or simply enjoy being outdoors. The best memories are often made when you step outside your usual routine.

And remember, every adventure comes with a story. One of our students somehow managed to get **both lost and found on Mount Royal**—which is harder to do than it sounds!

Have fun.

Be curious.

Be kind.

Stay safe.

Make memories that are worth telling!
